## Resident portal irvine company

Irvine Company Apartment Communities creates and supports distinctive apartment residences where a culture of extraordinary service and continuous innovation offers not only a better place, but a better way to live. Each of our more than 125 communities is grown in a unique way to create a sense of home aspiration for more than 65,000 households across the most desirable places in coastal California, including San Diego, Orange County, West Los Angeles, and the Bay Area. By combining attractive environments, enriching experiences and thoughtful design, our communities promote the well-being of every resident, creating a way of life in a class of its own. Our diverse collection of modern floor plans is designed with every detail in mind, while resort-style amenities add fun to everyday life. Guided by Irvine Company's thoughtful strategy and commitment to ownership forever, our cutting-edge reinvestment strategy means residents enjoy the unlimited inspiration of an ever-changing community. What really sets us apart? Just ask one of our residents. Particularly attentive on-site teams have a white-gloved approach that always exceeds expectations—thinking about even meeting the needs, desires and unexpressed wishes of the people they proudly serve every day. Irvine Company Corporate Profile is committed to the long-term ownership of a high-quality real estate portfolio, the scope of which is unmatched in the industry. The Irvine Company maintains a long tradition of philanthropy and environmental stewardship, supporting causes ranging from environmental preservation to education and scientific research. Donald Bren Chairman's Board Experience The Difference This is the first time I've left a review for an application. As an iOS developer, I'm upset by how horrible this app was made. Views grow and jump in wrong domains, the data is not updated after the application restarts, or even the reins. Notifications don't fade in the app or on the home screen. The user experience is upside down and upside down in every way, their overuse of web views (loading the website into the app) is surprisingly overused and buggy, although it was probably a budget issue/demand of the Company. Data does not register. I have updated my information several times (for some reason my phone number is completely incorrect on all company irvine systems and application, although I have updated it with them in person, and across all said systems). Notifications come super late and it's disconnected from the actual services they use (i.e. I'll get a package delivered via Parcel Pending and won't be notified in the app until I call resident services to ask where's my package? UPS said it was delivered). Really disappointed with the overall quality, given the luxury apartment experience I'm promised. It took smart developers to make great applications 5 years ago, now it only takes someone/a company to find the right tools/team to create one for you. × please enter all the information as it appears on your lease.
